2 ABEC has advised that the vehicle must arrive at Ryde at 12.40 hrs.

Using the information given in the case study, prepare a single-manned schedule for the combined deliveries to Southampton and Ryde. Your schedule must start when the driver begins work at Wolverhampton and end upon arrival at Ryde.

Notes:

You MUST show the destination for all driving periods.

Tachograph symbols are NOT acceptable.

Start Time	Finish Time	Activity	Tachograph Mode

3 David Smith has asked for some help with costing.

- (a) You are required to calculate the cost of training two drivers, to enable them to drive vehicles carrying regulated dangerous goods. David Smith insists that the cost of the drivers' wages while on the courses must be included and that the total cost must be expressed as a cost per journey, allocated over the life of the drivers' qualifications.

Use the information given in the case study to calculate the cost of this training, per journey completed on ABEC work.

Note:

You MUST show all your workings, name each cost and give all answers to the nearest penny.

- (b) You are required to calculate the cost of each single-manned, round-trip journey making the proposed Southampton and Ryde deliveries. For costing purposes, David has told you to allow one day's standing costs.

Notes:

You MUST show all your workings, name each cost with a total for each and give all answers to the nearest penny.

(b) You have been asked to advise on actions required with regard to the operators licence, to allow OCR Transport to take on the new work offered and expand as the directors wish. David has asked you to keep costs to a minimum. He has also said that application(s) must be for the minimum that is required, whilst achieving the objectives.

Describe **SIX** desired outcomes from the application that you are making.
